This program enters the fascinating world of animals to reveal sophisticated and complex designs that shake the traditional foundations of evolutionary theory. For the past 20 years, Dr. Jobe Martin has been fascinating his students as he lectures on these remarkable animals that cannot be explained by traditional evolution.

Dr. Martin was a traditional evolution-

ist, but his medical and scientific training would go through an evolution . . . rather a revolution when he began to study animals that challenged the scientific assumptions of his education.

### **Have You Ever Wondered . . .**

Are there really creatures that produce fire to defend themselves?

How does a giraffe get a drink without causing lethal blood pressure to his brain?

How can geckos walk upside down, even on glass, and not fall?

*Incredible Creatures That Defy Evolution 1* presents powerful evidence that proves that animal designs can only be attributed to a Creator. They cannot possibly be explained by evolution. This program will inspire you to look more closely at the world around you.
